

At a time when many companies are downsizing, we are bucking the trend.

In fact, the past two years have been truly amazing for Clinical Methods—providing us with the opportunity to refine our systems and processes. And with this growth brings new opportunities and new ventures.

WELCOME TO **ANOLINX™**

Anolinx™ is the result of taking the Health Data Analytics side of Clinical Methods and retooling it into a vibrant entity that deserves a focus all its own. With these separate companies, we're now better able to service your needs with greater precision.

We look forward to telling you more about Anolinx and what we can offer. It's because of customers like you that we're able to enhance our offerings in this way. **Therefore, we remain completely dedicated to your business and are anxious to continue our strong relationship.**

Mahalo,

Aaron Kamauu, MD, MS, MPH
